

Envafolimab 重组蛋白

种属:	Human Cells
表达系统:	Prokaryotic expression system、Eukaryotic expression system
标签:	C-His
同用名:	Envafolimab; KN035
分子量:	15.5 KDa
纯度:	Greater than 95% as determined by Tris-Bis PAGE.
储存条件:	Lyophilized from a 0.2 μ m filtered solution of 20 mM Tris, 100 mM NaCl, pH7.4.
备注:	Always centrifuge tubes before opening.Do not mix by vortex or pipetting. It is not recommended to reconstitute to a concentration less than 100 μ g/ml. Dissolve the lyophilized protein in distilled water. Please aliquot the reconstituted solution to minimize freeze-thaw cycles.
储存时间:	Lyophilized protein should be stored at $\leq -20^{\circ}\text{C}$, stable for one year after receipt. Reconstituted protein solution can be stored at 2-8 $^{\circ}\text{C}$ for 2-7 days. Aliquots of reconstituted samples are stable at $\leq -20^{\circ}\text{C}$ for 3 months.
运输:	Shipping with dry ice.

背景:

Envafolelimab is a humanized single-domain antibody recombinant protein targeting PD-L1, and is the world's first and currently the only nano-antibody used in cancer therapy. Its primary indications are unresectable or metastatic microsatellite highly unstable (MSI-H) or mismatch repair gene defective (dMMR) in adults with advanced colorectal cancer, gastric cancer and other advanced solid tumors. By blocking the action of immune checkpoint PD-1 and its ligand PD-L1, the ability of cancer cells to escape immune is inhibited, thus achieving anti-tumor effects.
